	II - 2021*

*Dates are subject to change.

Shadow Lake Village Residents

Thinking of Switching to Natural Gas?

Helpful FAQs to get you started!

Do I have to sign up for natural gas service for my unit?

No. Each individual unit owner can decide if they want natural gas service installed.

Does New Jersey Natural Gas (NJNG) charge to install a new natural gas service line?

Good news! Your service line from the main in the street to the meter on your house will be installed **free of charge**, providing service is activated and consuming natural gas within six (6) months of the date of installation. And, because Shadow Lake Village roads are private, there is no street-opening permit required by your township.

How long will it take to get my natural gas service installed?

Once the natural gas main is adjacent to your property and activated, the waiting period for new service is approximately four to six weeks.

Will the installation of my natural gas service line disturb my property?

Since service lines are typically installed approximately 18" to 24" under grade, the landscaping around the building could be disturbed. However, our crews make every effort to minimize the disturbance, and will restore the affected area after construction is completed.

Once my service line to the meter location is installed, is there a charge for setting the natural gas meter?

A one-time account opening charge of \$15 will appear on your first NJNG bill. A monthly customer charge (currently \$8.80) will also appear on your NJNG bill. You may be required to provide a security deposit equal to two months of average estimated billing at the applicable rate, but not less than \$40. However, you may obtain a waiver by providing a letter of credit from another natural gas or electric company confirming you had service in your name within the last 12 months and are in good standing.

Do I need to convert all my appliances to natural gas right away?

No. You are responsible for activating and consuming natural gas within six (6) months after the date of service installation.

Trouble Paying Your Energy Bills?

Once you make the switch to natural gas, we are committed to meeting your energy needs. And that means connecting you with energy assistance programs to help pay your natural gas costs.

Don't make the assumption you're not eligible for energy assistance. Whether you're currently receiving energy grants or experiencing temporary hardship, there are a variety of programs available to help make energy costs more affordable.

Keep an eye out for NJNG's upcoming Energy Assistance Days in your community ... we'll help determine which programs you may qualify for, and even help you with the application process.

The SAVEGREEN Project®

Your Source for Energy-efficiency Rebates and Financing

The SAVEGREEN Project from New Jersey Natural Gas (NJNG), and New Jersey's Clean Energy Program™ (NJCEP), provides rebates and financing options to help make home energy improvements more affordable. Whether you're replacing one or more pieces of equipment, want to upgrade your insulation or convert to natural gas heat, we have rebates and incentives to help you save. Terms and conditions apply.

Whole-home Efficiency Rebates and Incentives

Rebates up to \$4,000 and Financing up to \$15,000

Don't just upgrade your HVAC and water heating systems. Maximize your energy savings through NJCEP's Home Performance with ENERGY STAR® (HPwES). This program focuses on improving the comfort of your home with solutions that include seal up and insulation in addition to system upgrades. An independent contractor will provide recommendations, associated costs and potential energy savings with an in-depth home energy analysis. You could be eligible for rebates and financing to make it affordable to implement these energy-efficiency measures.

Rebates up to \$4,000 are available based on the total energy savings achieved in your home from recommended measures. Plus, you may be eligible for **NJNG financing up to \$15,000**, including a \$10,000 0% APR option.*

HPwES Rebate Level	Requirements
\$2,000 rebate**	Estimated total energy savings between five and 19 percent
\$3,000 rebate**	Estimated total energy savings between 20 and 24 percent
\$4,000 rebate**	Estimated total energy savings of 25 percent or more

**Not to exceed 50 percent of the costs of eligible measures.

NJCEP bonus incentives available for homes located in an Urban Enterprise Zone (UEZ).[†]

Contact our energy-efficiency consultants at 877-455-NJNG (6564)
to learn how to maximize your energy savings.

*All offers are subject to available funding. NJNG reserves the right, with the approval of the State of New Jersey Board of Public Utilities, to terminate, modify, suspend or extend this rebate program. For example, on a \$10,000 repayment with an APR of 0% and a term of seven years, the customer would make 83 payments of \$119.05, and one final payment of \$118.85. For example, on a \$15,000 repayment with an APR of .99 percent and a term of 10 years, the customer would make 120 payments of \$159.02. Terms, conditions and eligibility requirements apply. NJNG incentives do not apply to new construction. Visit NJCleanEnergy.com for NJCEP rebates, terms and conditions.

[†]UEZ address verification is required. Verify address at <https://www.nj.gov/njbusiness/financing/uez/> and submit screen shot of verified address to NJCEP. (0819)
