

NJ 50x30 Building Electrification Committee

Co-Chairs: Pat and Steve Miller

- **Seek to reduce NJ GHG emissions 50% by 2030 and 100% by 2040**
- **By using clean energy sources in 3 highest sectors (87% of all emissions):**
 - Electricity generation - 19% (solar, Community Solar, wind)
 - Transportation - 42% (EVs and chargers)
 - **And especially BUILDINGS - 26%** (electric heat pumps for space and water heaters and dryers, electric induction stoves)
- **How? By partnering with other organizations**
 - Education of consumers and HVAC dealers **MONTHLY WEBINARS**
- 3rd Thurs, develop industry training)
 - Advocacy for clean energy laws and regulations with NJ government agencies (BPU, DEP, DCA, etc) and legislature
- **2023 ACCOMPLISHMENTS**
