Solar Landscape Announces Green Ambassador Program And Scholarship For NJ High School Students

New Jersey **Community Solar**

- ✓ Program was built and is overseen by the Board of Public Utilities as part of the Governor's **Clean Energy Act of 2018**
- ✓ Goal - Environmental justice by investing in communities to provide:

Reduction in Electricity Costs

Discounted solar electricity allocated to the subscriber

Cleaner Air in the Community

Solar Landscape's projects prevent more than 42,500* metric tons of carbon dioxide from entering the atmosphere each year

Access to Everyone

Those that can't afford, or don't want, panels on their roof can now have access to clean solar energy

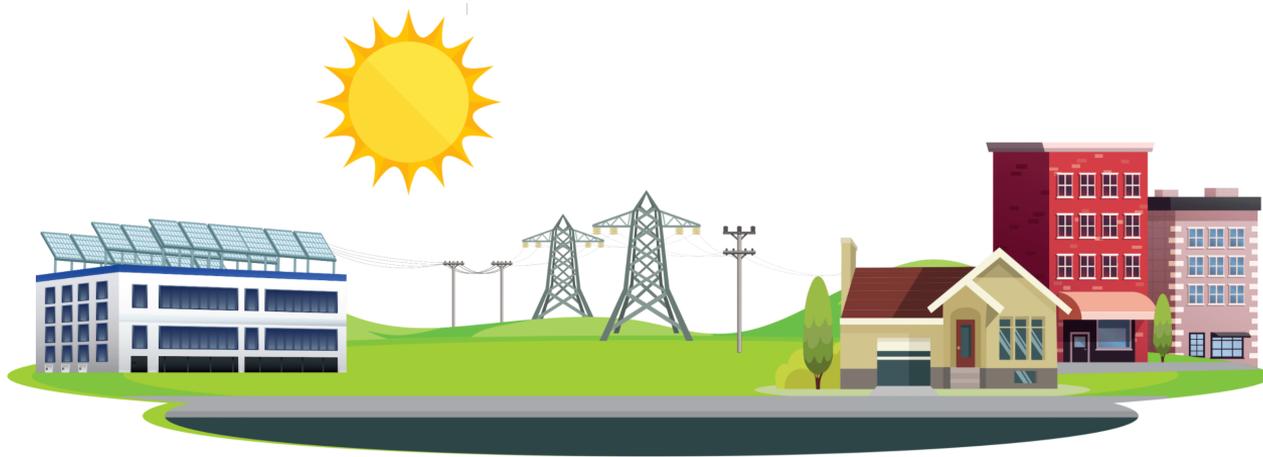

Local Workforce Development

Through job training, job production, school enrichment, and green ambassador program

*Calculated using the EPA carbon equivalency calculator

How Community Solar Works

1

A solar developer applies to build a project on a commercial rooftop, landfill, or brownfield. Once it is awarded by the state the developer has a year to build the project.

2

The energy is fed into the local utility grid to service adjacent municipalities or counties depending on the application.

3

An interested community member accesses the project through the project's subscription website to receive discounted solar energy.

Free State Clean Energy Program

Lower energy costs

No panels on your properties

Community Solar Highlights

No Rooftop Panels

Access for All!

Zero Emission Energy!

Save Money

No Hidden Costs

**No Credit or Income

NJ Community Solar Impact

150

Approved Projects

The total number of community solar projects approved in the first two years of the NJ Community Solar Energy Pilot Program .

+35,000

NJ Residents

The number of NJ residences powered by clean solar energy without the need for panels on residential rooftops

+200,000

Metric Tons

Carbon dioxide that will be prevented from entering the NJ atmosphere each year by projects built through the first two years of New Jersey's Community Solar program

“Everybody should be able to take advantage of the opportunities that solar provides, regardless of where they live and regardless of their income level.”

NEW JERSEY GOVERNOR PHIL MURPHY

Benefits of Community Solar

ENERGY GENERATION

Each project generates kWh of clean electricity to be sold to NJ residents.

CLIMATE CHANGE

Community Solar projects are already preventing millions of tons of carbon dioxide from entering the atmosphere every year.

ENERGY EQUITY

Expanding environmental justice by ensuring solar access for all – especially underserved communities.

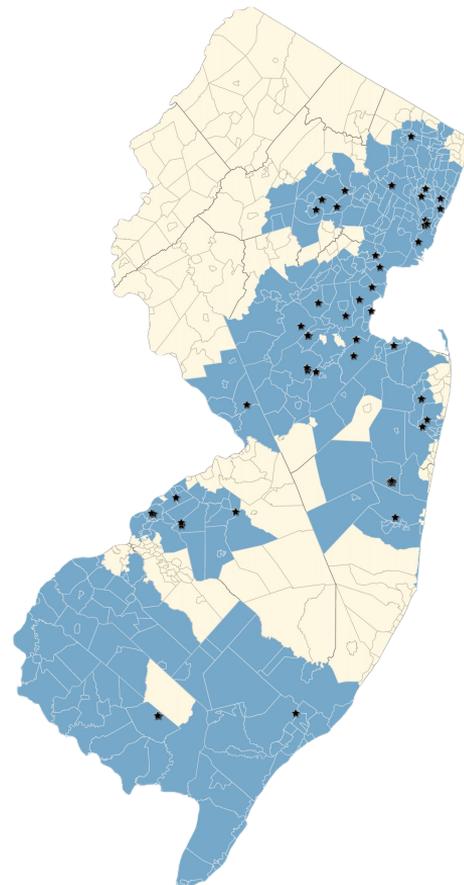

COST SAVINGS

Subscribers receive a cost savings on the portion of solar credited to their bill
